# Year 6 Transition - Welcome to Science

## Chapter 16 : Planet Anthallen

Our world is clean. We have access to limitless energy that does not pollute... It is disease-free and has been even since before the Big Burn, the planet-wide fire that raged for decades and killed almost everything.

We are the only creatures that inhabit it; the last “animals” to inhabit it were almost successfully eradicated centuries ago ...The functions that some lower creatures performed (such as digesting waste products or enabling crop growth ) have since been carried out efficiently, safely and hygienically by synthetic robots.

# Year 6 Transition - Welcome to Science

**COMPETITION  
TASK !!**

You are a member of a Science Team leading an expedition to Planet M. Food supplies on Earth are running low due to growth in population and lack of farmland due to the development of mega-cities !

Your task is to research Planet M using the videos and resources provided to determine whether it is a suitable environment for Transition Mission GGP (Growing Green Peas)

You need to compile a detailed report of your findings

**TAKE A PHOTO OF YOUR REPORT AND CLICK HERE TO UPLOAD IT TO THE PORTAL TO WIN A FREE BREAKFAST AND TO ENTER INTO THE PRIZE DRAW !!**
